# In India, Case Positivity $\propto$ Testing

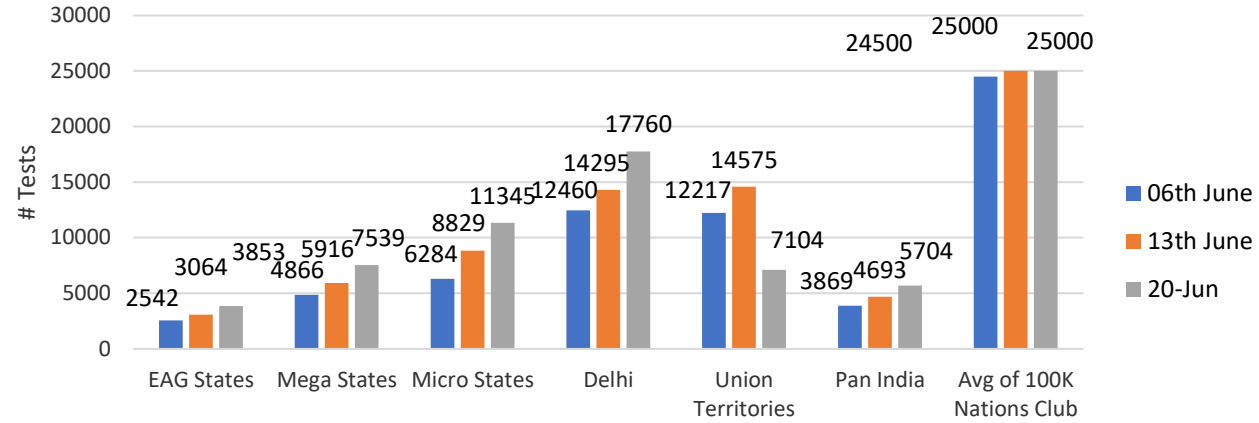

India is planning to increase the number of tests by 10 times. It is a good sign. At the same time, number of cases will increase in direct proportion.

### Test Positivity Rate

### Test Per Million Population

Zones in comparison with Pan India and Global Benchmark

### Case Fatality Rate

Zones in comparison with Pan India and Global Benchmark

### Fatality / Million Population

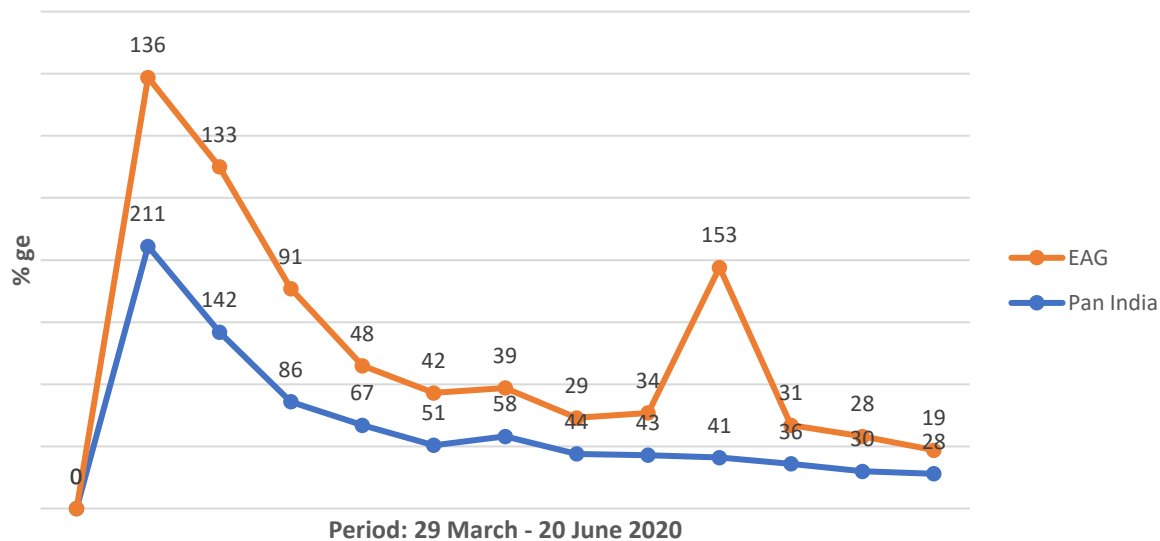

Zones in comparison with Pan India and Global Benchmark

Increase in tests leading to increase in positivity. Delay in testing, leads to increase in fatality (spread virus)
